Avenida Alberto Flores bridge opens to traffic in both directions

The bridge installed on Avenida Alberto Flores, in Brumadinho (Minas Gerais) will be open to traffic in both directions by the end of the day Wednesday, 10/4.

It will provide the communities of Parque da Cachoeira, Córrego do Feijão, Melo Franco, Marques, Aranha, Palhano, Córrego Ferreira and Casa Branca, among others, safe access to the central area of Brumadinho.

Built in concrete and steel, the structure is 50 meters long and includes a pedestrian sidewalk, which will be completed by the end of the month. All works are being carried out by Vale.

Another important work nearing completion is the sheet pile wall next to the Alberto Flores bridge. The barrier will help retain and prevent the tailings from covering the road again.
