Carajás settled a new production record

Companhia Vale do Rio Doce (CVRD) informs that Carajás iron ore production reached a new monthly record of 7.8 million tons in November, operating at an annualized output rate approximately to 2007 estimated nominal capacity. In 9M06, Carajás produced 59.5 million tons of iron ore, an increase of 14.1% compared to the same period a year earlier.

The new record mark reflects CVRD efforts to meet the strong global demand growth for iron ore from its clients.
